I forwarded David the email with a link to the osc.org webpage with several presentations uploaded unto it. I'm not sure if he has had time to review but I'll check with him.

We've activated the REOC for the R8's Area Command of the Gold King Mine Spill. So I'm doing nothing else.

Thanks for checking and I'll have David keep you all in the loop.

Hey There John – hope all is well. Just wondering if Greg and Tony gave you (and Dave) enough info to run with for SO refresher training. I think it's a great idea and when he puts something together, I'd love to see the other regions present it as well. One thing I might add is a review of the ICS plans that the SO is ultimately responsible for....
